Cloud Native Developer | Observability | Go & Python

SUMMARY

Cloud Native Developer with 4+ years building Golang microservices in distributed, observability-focused environments. Strong foundation in Kubernetes, Docker, and CI/CD, with academic depth in AI/ML through an MSc in Computer Science.

WORK EXPERIENCE

Ericsson | Cloud Native Developer

Stockholm, Sweden • Aug 2026 - Current

- In 2026, I took a 6-month period of leave to study Arabic at Umm Al-Qura University in Saudi Arabia. I've since returned to Stockholm and am back with my team in the Observability domain, now focused fully on development.

Ericsson | Cloud Native Developer & Scrum Master

Stockholm, Sweden • Aug 2022 - Jan 2026

- Engineered and maintained Golang microservices within the Observability domain, communicating via gRPC and REST, deployed across Kubernetes, Helm, and Docker with CI/CD pipelines in GitLab.
- Contributed to code reviews and feature implementation across two production microservices supporting cloud-native infrastructure monitoring.
- Mentored and onboarded junior developers, contributing to team capability and knowledge transfer.
- Facilitated Scrum ceremonies for a cross-functional team, supporting sprint velocity and proactive blocker resolution.
- Awarded Key Contributor Award (2024) for contributions to team leadership during organizational transitions.

Simple [A] | Software Developer Intern (R&D)

Remote • Jan 2019 - Jun 2019

- Built NLP-powered conversational AI prototype in the R&D division, integrating Dialogflow, GraphQL, and Neo4j Graph Databases to validate production feasibility.

Mjukhud | Junior Web Developer

Remote • Jan 2015 - Dec 2016

- Maintained and optimized Magento and WordPress sites, implementing asset minification, critical path rendering, and security patches to achieve measurable improvements to PageSpeed Insights scores and overall platform reliability.

EDUCATION

MSc Computer Science, Software Technology

Linnaeus University - 2022 - Grade: A

Thesis: "Spot the Pain: Exploring the Application of Skeleton Pose Estimation for Automated Pain Assessment", implemented in TensorFlow/Keras

BSc Computer Science

Linnaeus University - 2020 - Grade: A

HE Diploma, Computer Engineering & Web Dev

Mid Sweden University - 2019 - Grade: A

SKILLS

Languages & Tools: Golang, Python, Docker, Kubernetes, Helm, Prometheus, OpenTelemetry, gRPC, REST, Git, GitLab, Jira, TensorFlow.

Methodologies: CI/CD, Cloud Native, Microservices, ML, Scrum, Agile.
