Scrum Master & Software Engineer | 5G Infrastructure | Cloud Native | Observability

WORK EXPERIENCE

Ericsson | Scrum Master & Cloud Native Developer

Stockholm, Sweden · Aug 2022 — Jan 2026

- Engineered and maintained Golang microservices within the Observability domain for cloud-native 5G infrastructure, managing deployments across Kubernetes, Helm, and Docker.
- Led all Scrum ceremonies for a cross-functional team, driving measurable improvements in sprint velocity and proactively resolving technical blockers.
- Mentored and onboarded junior developers, contributing to team capability and knowledge transfer.
- Awarded Key Contributor Award (2024) for excellence in product strategy and guiding the team through organizational transitions.

Tech Stack: Golang, Kubernetes, Helm, Docker, Prometheus, Grafana, GitLab

Simple [A] | Software Developer Intern (R&D)

Remote · Jan 2019 — Jun 2019

- Built NLP-powered conversational AI prototype in the R&D division, integrating Dialogflow, GraphQL, and Neo4j Graph Databases to validate production feasibility.

Mjukhud | Junior Web Developer

Remote · Jan 2015 — Dec 2016

- Maintained Magento backend and implemented performance optimizations including asset minification and caching strategies.

CERTIFICATION

Professional Scrum Master I (PSM I)

Scrum.org
